*A school's AYP Index represents an average of the points that are assigned for each student's achievement in either the NECAP or VTAAP assessment. More information about the index can be found here: http://education.vermont.gov/documents/EDU-Accountability_Operations_Manual_March_2011.pdf. The schools above have had an increase of 10% or more in their Reading or Math AYP Index score for all students or one or more subgroups. The increase is measured by comparing the current year's AYP Index score with the average of the previous two year's AYP Index score. This applies only to groups who have had more than 15 students for each of the three years used.
